SMART FEATURES AT A GLANCE

IoT Enabled

Easily monitor and control your water system remotely via connected devices.

Automatic Motor Operation

Switches ON/OFF automatically using advanced float sensors, ensuring consistent water levels.

AI-Powered Intelligence

Communicates with other water level controllers in your system. Dynamically decides motor runtime for optimal performance.

Dual Operating Modes

Auto Mode: Hands-free water management.
Manual Mode: Full control when you need it.

Built-in Safeguards

Adjustable maximum motor run time to protect against overheating.

Versatile System Support

Compatible with both Sump and Overhead Tanks.

Customizable Settings

Fine-tune parameters like Pump Run/Break Time, Cut-Off Timers, and more for tailored efficiency.

Detailed Reporting

Comprehensive usage statistics for smarter decision-making.

Intuitive Interface

Designed for simplicity and ease of use, even for beginners.

WHY CHOOSE US?

Water Conservation

Avoid overflow and wastage with precise control.

Energy Efficiency

Prevent motor overuse, saving power and reducing costs.

Reliable & Safe

Advanced safeguards to keep your system running smoothly.

PERFECT SOLUTION FOR

- > Homes
- > Apartments
- > Industries
- > Farms

TECH SPECS

Input Voltage	170 – 250V (Single Phase)	
Output Voltage	170 – 250 V, Single Phase Motors up to 2 HP (Submersible / Jet / Piston)	
Connectivity (optional)	WiFi	
Accessories	Mandatory	Water Level Float, Dry Run Sensor
	Optional	Flow Meter, Distance Sensor, Pressure Sensor
Applications	Houses Offices Apartments Commercial buildings Hotels Industries
